

Tutorial za konfigurisanje i pokretanje JUnit testova u IntelliJ IDE-u

Konfiguracija

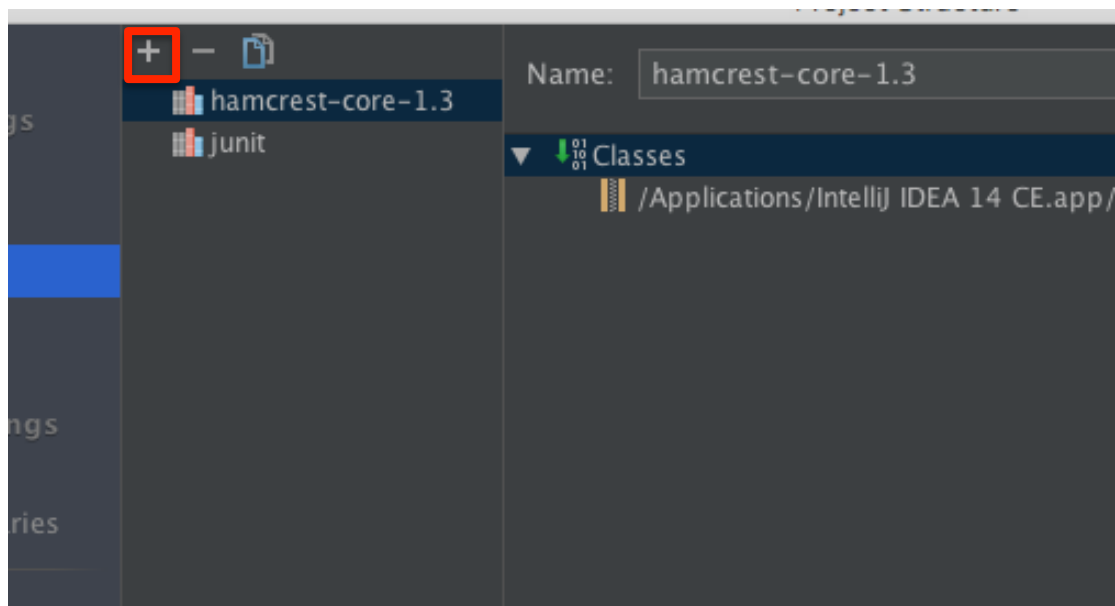

1. Kada otvorite IntelliJ, idite na File -> Project Structure

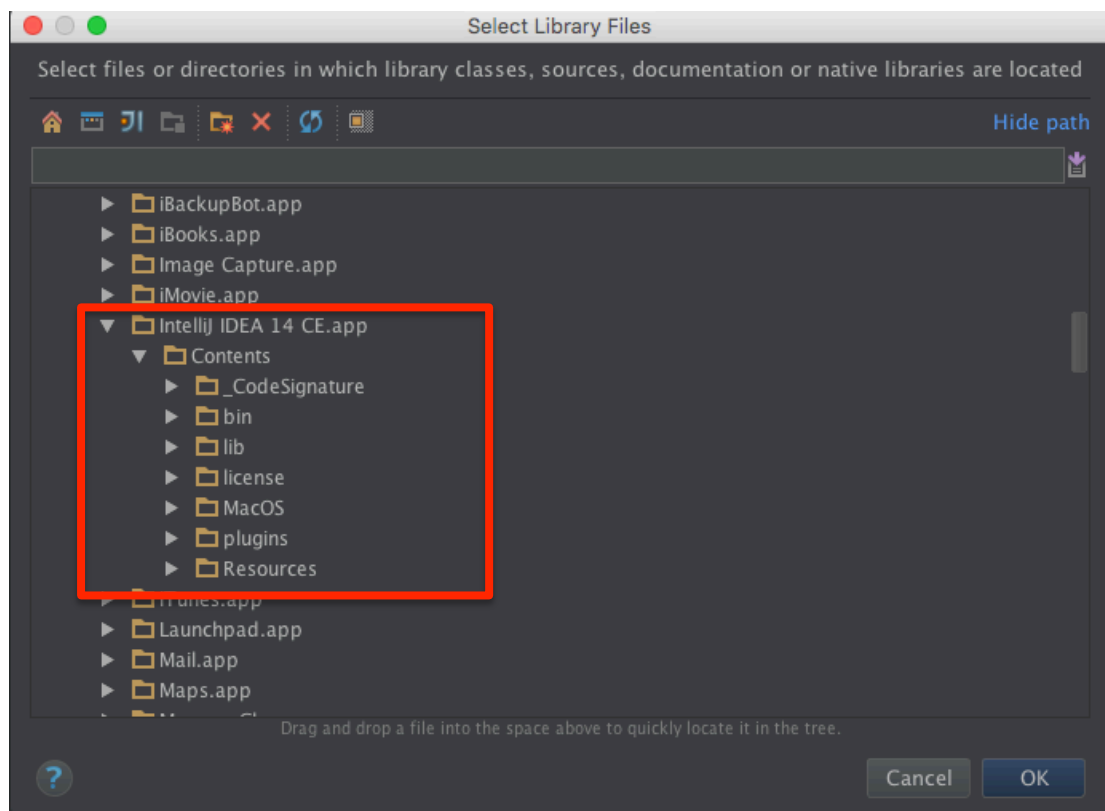

2. Kada vam se otvori "Project Structure" prozor, u levom sidebaru izaberite stavku "Libraries"

3. Kliknite na znak + u gornjem levom uglu

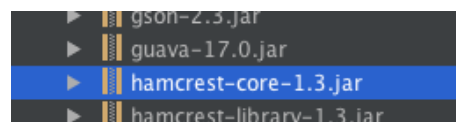

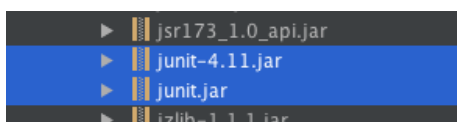

4. U otvorenom prozoru idite do lokacije na kojoj vam je instaliran IntelliJ

5. Idite u Contents -> lib pa selektujte sledece .jar fajlove:

- junit-4.11.jar (moze se desiti da imate drugu verziju npr 4.12 etc)
- junit.jar
- hamcrest-core-1.3.jar

6. Kliknite “OK”, otvorice vam se “Choose Modules” prozor, i u njemu kliknite “OK”. Nakon toga bicete vraćeni na “Project Structure” prozor gde ce te kliknuti “Apply” i zatim “OK”.

Pokretanje testa:

Pritisnite desni klik na folder “Tests” i u otvorenom meniju izaberite “Run Tests in ‘rs.edu.rafa.rafapi.test’”
